

Mission Statement

Space Coast Symphony Orchestra is committed to changing lives through music's extraordinary power to communicate, and thus inspire, uplift, educate and entertain. We are dedicated to challenging classical performance boundaries by offering fresh interpretations of the great masterworks as well as the discovery of new and unusual works. Above all, every performance must connect with our audience. Music at its best is a shared experience between performer and the listener.

Our mission has three inseparable parts

1. The artistic focus of our mission:

- To provide a sustainable orchestra to professional and talented members of the musical community.
- To present live performances and live music education programs that are easily accessible throughout our community

2. The educational focus of our mission:

- To cultivate awareness, knowledge and enjoyment of music
- To support music education opportunities for people of all ages
- To partner with the Brevard Symphony Youth Orchestra and provide the opportunity for talented youth musicians to perform along side professional musicians.

3. The community focus of our mission:

- To emphasize the universal language of music which speaks to all cultures
- To establish and strengthen connections between the SCSO and our entire region
- To establish partnerships with other musical ensembles and collaborate with businesses.
- By bringing SCSO musicians together with a variety of groups in our community
